FOR IMMEDIATE RELEASE

## PLANTING TREES IS JUST PART OF THE GREEN

October 11, 2011

Brantford, ON - Energy Guy Canada Ltd. announced today that they have partnered with Forest Recovery Canada to plant trees across Canada for every pre-retrofit energy evaluation completed with a paperless report.

Energy Guy Canada Ltd. is a team of professional energy advisors located in Brantford, Ontario and operating in five provinces in Canada. "Our energy advisors help homeowners identify areas where they can reduce their energy bills, reduce their reliance on fossil fuels and make their homes more comfortable." says Todd Downey, VP of Operations at Energy Guy Canada Ltd. "Environmental sustainability has always been a cornerstone of our organization, and our new partnership with Forest Recovery Canada allows us to continue to build a more eco friendly Canada. Tree planting is a permanent statement of our commitment."

Energy Guy Canada Ltd. advisors have performed over 185,000 energy evaluations and have planted over 40,000 trees to date. According to Forest Recovery Canada research, as a result of Energy Guy Canada's tree planting initiatives, over 235,000 kg of CO<sub>2</sub> are absorbed and 181,000 kg of oxygen are created annually.

"Our goal is 100% paperless reports; we'll use less paper, less pollutants due to postal delivery and a tree planted for every evaluation we perform. Anything less than 100% is a sign we can do better for our environment" says Downey. "Our company motto is 'Think Green. Live Green. Save Green.' Planting trees is a perfect way to live our motto".
