

ONTARIO ENBRIDGE/UNION GAS REBATE

New Rebate Criteria **June 3, 2021**

Follow these 4 easy steps
to qualify for Ontario Enbridge/
Union Gas Rebate:

1 Schedule an energy assessment
with **EnergyGuy** for your home before you
start your energy updates.

Call or Text: 888-442-9577

Online Appointment: www.energuy.com

2 Complete a minimum of two
eligible upgrades **within 120 days**.

*Any furnace replacement requires
a total of THREE eligible upgrades.

3 Schedule your “post-retrofit”
energy assessment with **EnergyGuy**.

4 Receive your rebate cheque
within 90-120 days when you qualify.

UP TO
CAD \$5,000
AVAILABLE IN REBATES

Attic Insulation: Rebates pro-rated based on the total ceiling
area % completed. Minimum 20% of total ceiling area upgraded.

\$750 – Increase attic insulation from R35 or less to at least R60

\$750 – Increase cathedral/flat roof insulation by at least R14

Wall Insulation: Prorated based on 20% minimum completed
and if more than one attic exists. Add minimum 20% of total wall
area upgraded.

\$1,750 – Add at least R9 to 100% of building to achieve a
minimum of R12

\$1,000 – Add at least R3.8 to 100% of building to achieve a
minimum of R12

\$3,000 – Add at least R20 to 100% of building

Homes Exempt from R12 Wall Insulation Minimum:

- Pertains to homes where the wall cavity structure is less than 2x4, thus wall cavity is insufficient to allow for an R12 upgrade (double or triple brick homes).
- During initial assessment, REA is to advise homeowner that pictures must be taken at time of contractor insulation work when the wall is open to demonstrate that the wall structure is eligible for the R12 exemption. These photos are to be provided to the REA during the final assessment.

See reverse side for more rebates

*See Union Gas website for full details uniongas.com/homerebate. See Enbridge website for full details www.enbridgesmartsavings.com.

*Homeowner responsible for cost of energy assessment, plus HST at time of the assessment. \$600 is rebated back to you when you qualify.

Basement Insulation*:  Bonus rebate available

\$1,250 – For adding at least R23 to 100% of basement

\$500 – For adding at least R12 to 100% of crawl space wall

\$750 – For adding at least R12 to 100% of basement

\$1,000 – For adding at least R23 to 100% of crawl space wall

\$1,000 – For adding at least R32 to 100% of floor above crawl space

Exempts and Minimum Requirements:

- A \$500 Bonus is available if you insulate the remaining uninsulated areas in your basement (minimum 5%) to have 100% insulated basement. For example, if your current basement is 90% insulated before your upgrades, you can insulate the remaining 10% to achieve 100% insulated basement and be eligible for \$500 bonus on top of the prorated rebate amount for insulating basement area.
- Minimum 20% of total basement wall area upgraded if not insulating 100% of basement. Minimum 5% required if insulating the remaining uninsulated area of basement. Rebates pro-rated based on the total area % upgraded.
- Rebates pro-rated based on the percentage of wall area insulated and does not include walls between individual units. For semi-detached, rebates are 75% of the amounts shown.
- When both a basement and crawl space are present, all applicable grants are pro-rated to a maximum of \$1,250 based on the total combined wall area of basement and crawl space. For example, if your total foundation area is 40% crawl space and 60% basement, and you add at least R23 to 100% of the crawl space area, but 0% of the basement area, then you would qualify for a \$400 rebate (40% x \$1,000 = \$400).
- Can qualify for either crawl space wall or floor above crawl space rebate.
- Insulate a minimum of 20% of the total ceiling area. When the roof consists of more than one type and/or sections (i.e., any combination of attic, cathedral ceiling and flat roof), rebates are pro-rated based on the total ceiling area percentages upgraded. The rebate for any combination of attic, cathedral ceiling and flat roof cannot exceed \$650.

Furnace/Boiler:

\$250 – Furnace

\$1,000 – Boiler

Any furnace replacement requires a total of three eligible upgrades.

For replacing a

less than 96% AFUE natural gas, furnace
less than 90% natural gas, boiler

With a

96% or higher AFUE condensing natural gas, furnace
90% or higher AFUE condensing natural gas, boiler

Exempts and Minimum Requirements:

- Only applicable to Union Gas and Enbridge customers with existing natural gas furnace/boiler as main heating source.
- A combi or combo system CANNOT qualify for both the space heating boiler rebate and the domestic hot water rebate. It counts as ONE measure.

Window/Door/Skylight: \$40 rebate per rough opening.
Bay window considered one rough opening.

\$40 – For each window, door or skylight replaced with Energy Star® qualified model

Air Sealing:

\$150 – Achieve 10% or more above base target

\$100 – Achieve base target

Water Heater: Maximum one water heater rebate per home

\$400 – Replace existing natural gas water heater with an EF of .77 or higher tank type Energy Star® qualified natural gas water heater

\$400 – Replace existing natural gas water heater with an EF of .87 or higher tankless type Energy Star® qualified natural gas water heater

Assessment Rebate:

\$600 – Will be rebated to homeowner to help cover the cost of the two energy assessment. Must meet eligibility criteria.

Bonus Rebate:

Complete **more than two** measures and qualify for additional bonus rebates.

- 3 Measures: \$150**
- 4 Measures: \$500**
- 5 Measures: \$750**

No additional bonus rebate for 6 measure or more.

*You cannot receive multiple rebates for the same heating system or cooling system, water heating system, insulation upgrades, the same windows or appliances. Where air sealing is completed to meet or exceed the base target identified in the pre-assessment you will be eligible to receive a rebate through the Home Efficiency Rebate program. Limited time offer. Maximum of 120 days between your first and second assessment allowed. If there are circumstances that don't allow you to complete your first and second assessment within 120 days, your advisor can request an extension which will be reviewed on a case-by-case basis. If you have already participated in the Home Efficiency Rebate program and receive a rebate, you may participate again as long as one year has passed since your post-renovation assessment and you are completing different upgrades. Rebates available on a first come, first served basis. Program enrollment and rebate payment subject to availability of funds. Union Gas reserves the right to revise program without advance notice including rebate amounts and eligibility. Homeowner responsible for ensuring rebate eligibility, choosing eligible certified energy advisors, keeping invoices and meeting criteria and deadlines.
